## PRODUCT BULLETIN

---

---

### SUBJECT: TYPE 24 DIAPHRAGMS

---

---

In an effort to eliminate the confusion caused by the recommended use of the “conventional” (2.25 inch stroke) diaphragm for both Type 24 “conventional” (2.25 inch) and “long stroke” (2.50 inch) applications, MGM Brakes has decided to reinstate P/N 8017141 and recommends the use of:

1. P/N 8017241 diaphragm for use in Type 24 “conventional” (2.25 inch) brake actuators.
2. P/N 8017141 diaphragm for use in Type 24L “long stroke” (2.50 inch) brake actuators.

Both MGM diaphragms meet the high standards for performance and reliability that our customers have come to expect from MGM Brakes.

If there are any questions concerning diaphragms, or any other brake actuator problem, please do not hesitate to call Customer Service at (704) 547-7411 or fax at (704) 547-9367.
